

The screenshot displays the IBM Cloud Account settings interface. The left sidebar lists various account management options, with 'Account settings' currently selected. The main content area provides details for 'Shalini S's Account', including its unique ID and trial status. Below this, three primary actions are available: adding a credit card for Pay-As-You-Go billing, upgrading to a subscription for discounted pricing, or contacting sales for assistance. The interface is clean and professional, using a dark header and a light main content area.
